PROBLEM

AI Scrapers and Bots Threaten Your Site

Automated bots steal content, probe files, and damage your WordPress site.

BULLETS

Your Content and Products Are at Risk

Scrapers steal your work; bad bots probe sensitive files.

- Loss of exclusive content and data
- Exposure of critical config files
- Damage to SEO and user trust

BULLETS

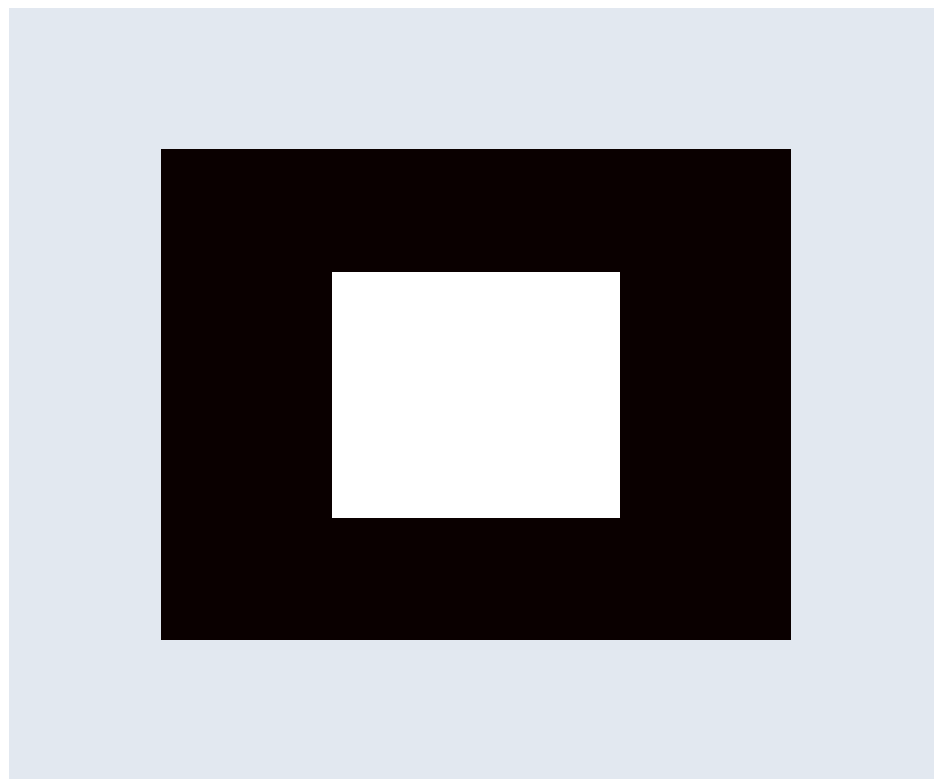

Agent Guard Blocks AI Bots Before Harm Happens

Behavior-based detection protects your WordPress site effectively.

- Detects AI crawlers and headless browsers
- Blocks probing of .env and wp-config.php
- Uses honeypots to trap automated bots

More details

Agent Guard protects your WordPress site from AI agents, scrapers, and bad

EMOTIONAL_STATEMENT

Peace of Mind for WordPress Site Owners

Control your site's security without risking SEO or
admin access.

BULLETS

Traditional Firewalls vs. Agent Guard

Beyond firewalls: AI bot detection tailored for WordPress.

- Traditional firewalls block broadly
- Agent Guard targets suspicious behavior
- Granular control prevents overblocking
